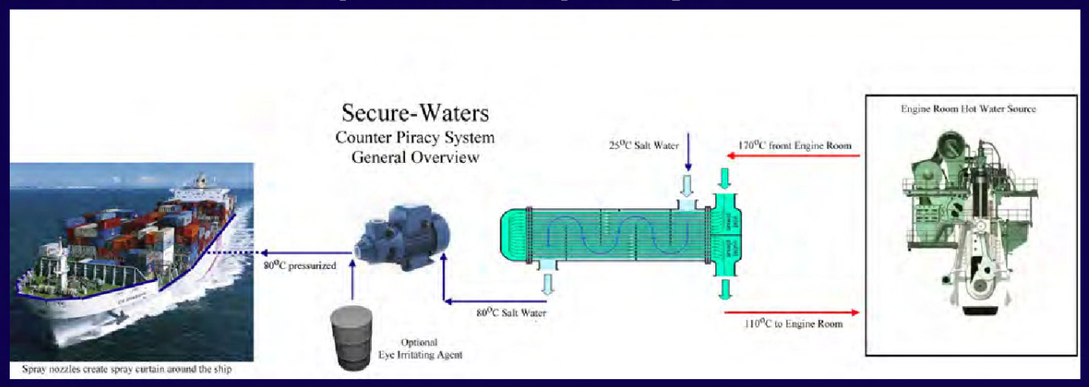
Counter Piracy

Secure-Waters - Hot Water System

Patent Pending

Stop Any Boarding Attempts

- Principle:
  - Install a special pipe around the ship with low pressure nozzle at intervals
  - Heat up the water, using the engine's heat source to 80-90 deg^{C}
  - Pump water through the pipes at low pressure
  - Create a hot water deterrent to prevent ship entry
- Usage:
  - Sophisticated system with Computer controls
  - Installation by crew and our teams
  - Medium entry cost
  - Full Deterrence against boarding attempts



Counter Piracy

Secure-Waters - Water 'Knife'

Patent Pending

Gain Time - Get Help

- Principle:
  - Install a special pipe around the ship with high pressure
  - nozzle at close intervals
  - Pump water through the pipes at high pressure
  - Create a painful deterrent to prevent ship entry
- Usage:
  - Quick and easy deployment at major maritime trade points
  - (e.g. Singapore, Rotterdam, Dubai, Suez)
  - Installation by crew alone
  - Low entry cost
  - Deterrence by water pain as well as high density spray
