

# Counter Piracy

**Secure-Waters Mark III  
Water Jet System**

Patent Pending

# Counter Piracy Solutions

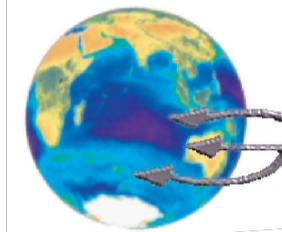

**Principle:**

- ▶ Install special water cannons around the ship with very high pressure nozzles at fixed intervals
- ▶ Use our supplied pumps to create an intense water cannon jet
- ▶ Water cannons move automatically to cover complete hull
- ▶ Create a fully protected ship against piracy intrusion

**Usage:**

- ▶ Complete system delivered in ready container
- ▶ System can be setup and removed by crew in a short time
- ▶ Complete system can be stored in container and placed on next ship
- ▶ Affordable and effective protection against ever increasing threat

# Counter Piracy

**Secure-Waters  
Hot Water System**

Patent Pending

**Stop Any Boarding Attempts**

# Counter Piracy

**Secure-Waters  
Water 'Knife'**

Patent Pending

**Gain Time - They will abort**

- **Principle:**
  - ▶ Install a special pipe around the ship with low pressure nozzle at intervals
  - ▶ Heat up the water, using the engine's heat source to 80-90 deg<sup>C</sup>
  - ▶ Pump water through the pipes at low pressure
  - ▶ Create a hot water deterrent to prevent ship entry
- **Usage:**
  - ▶ Sophisticated system with Computer controls
  - ▶ Installation by crew and our teams
  - ▶ Medium entry cost
  - ▶ Full Deterrence against boarding attempts

- **Principle:**
  - ▶ Install a special pipe around the ship with high pressure and large capacity water
  - ▶ Nozzles at close intervals
  - ▶ Pump water through the pipes at high pressure and large volume
  - ▶ Create a painful deterrent and flood boats to prevent ship entry
- **Usage:**
  - ▶ Deployment at major maritime trade points
  - ▶ Installation by crew and our teams
  - ▶ Medium entry cost
  - ▶ Deterrence by water pain as well as high density water fall
